

## Perma Automatic Lubricators Tip of the Week

Industrial preventive maintenance utilizing automated systems is the way of the future – for **safe, effective and long-term cost-savings** turn to perma automatic lubrication systems. You will get the best technical solution for every lubrication point and gain more time for other important tasks.

These single and multi-point lubrication systems can be filled with **grease or oil**. On roller and sliding bearings, blowers and fans, chains, folders, pumps, presses, motors, open gears, conveyors, elevators, escalators and a host of many other applications with virtually any lubricant.

**Lard Oil can help you evaluate the SAFETY and LABOR EFFICIENCY benefits for your facility.**
